The screenshot displays the Qqelly Market Overview application interface. The top navigation bar includes the Qqelly logo and various market metrics: BTC \$64,466.72 (+1.84%), ETH \$3,412.21 (+0.92%), GLOBAL OI \$114.65B (+0.54%), LIQUIDATIONS \$180.19M (-47.29%), and BREADTH 62. A 'STATIC VISUAL PREVIEW' warning is also present. The main header features a search bar and navigation tabs for Home, Markets, Discover, Deriv., Research, Portfolio, Evidence, Ops, and Trust. The central content area is titled 'See the evidence behind every market signal.' and includes a sub-header 'VERIFIABLE MARKET INTELLIGENCE'. Below this, a paragraph states: 'Qelly unifies market structure, research context, source provenance and decision history in one governed intelligence workspace—without pretending simulated preview data is live.' Two buttons, 'Explore Asset Rankings' and 'Open Theme Studio', are visible. A section titled 'Intelligence preview' shows three metrics: BTC confidence (82 / 100), Liquidity state (Balanced), and Evidence age (2m 14s). A line graph with a red line and a green dot is displayed below these metrics. At the bottom, a table shows research aligned data for ETH (+0.92%) and SOL (-1.18%). The footer section is titled 'PUBLIC MARKET LAUNCH' and 'Market Overview', with a paragraph about read-only public exchange observations. Three buttons at the bottom right are 'Source inspector', 'Provider coverage', and 'Explore assets'.

The screenshot displays the QQLY homepage, which is a market intelligence platform. The top navigation bar includes the QQLY logo, a search bar, and various market data points such as BTC price, ETH price, and global oil price. The main content area features a large hero section with the QQLY logo and the headline "See the evidence behind every market signal." Below this, a paragraph explains that QQLY unifies market structure, research context, source provenance, and decision history in one governed intelligence workspace. Two buttons, "Explore Asset Rankings" and "Open Theme Studio", are prominently displayed. To the right, an "Intelligence preview" widget shows a line chart and key metrics like BTC confidence, liquidity state, and evidence age. The bottom section, titled "PUBLIC MARKET LAUNCH", features the heading "Market Overview" and a brief description of the platform's capabilities. A sidebar on the left contains navigation links for Home, Markets, Discover, Deriv., Research, Portfolio, Evidence, Ops, and Trust. The bottom right corner includes buttons for "Source inspector", "Provider coverage", and "Explore assets".

The screenshot displays the Qqelly Market Overview interface in a dark theme. At the top, a header bar shows the Qqelly logo and various market metrics: TC \$64,466.72 (+1.84%), ETH \$3,412.21 (+0.92%), GLOBAL OI \$114.65B (+0.54%), and LIQUIDATIONS \$180.19. A yellow banner indicates 'STATIC VISUAL PREVIEW' with a note that data is deterministic and not live. Below the header, a navigation bar includes a search bar, a 'Theme Studio' button, and dropdown menus for 'STATE' (Simulated) and 'PERSONA' (Scalper Velocity). A sidebar on the left lists navigation options: Home, Markets, Discover, Deriv., Research, Portfolio, Evidence, Ops, Trust, Explain, and Menu. The main content area features the Qqelly logo and the tagline 'VERIFIABLE MARKET INTELLIGENCE'. A large headline reads 'See the evidence behind every market signal.' Below this, a paragraph states: 'Qelly unifies market structure, research context, source provenance and decision history in one governed intelligence workspace—without pretending simulated preview data is live.' Two buttons are present: 'Explore Asset Rankings' and 'Open Theme Studio'. A green dot indicates that the static preview uses deterministic demo observations and that trading execution is unavailable. On the right, an 'Intelligence preview' section shows three metrics: BTC confidence (82 / 100), Liquidity state (Balanced), and Evidence age (2m 14s). Below these is a line chart with a red line and a green dot. At the bottom of this section, a table shows research-aligned data for ETH (+0.92%) and SOL (-1.18%).

VERIFIABLE MARKET INTELLIGENCE

See the evidence behind every market signal.

Qelly unifies market structure, research context, source provenance and decision history in one governed intelligence workspace—without pretending simulated preview data is live.
